

Spiral Based Point Cloud Representations of Sculptures Gallery Supplement

Douglas Dwyer

May 2022

This supplement presents higher resolution and more artistic versions of the Figures in 'Spiral Based Point Cloud Representations of Sculpture'. It also provides some additional examples, three of which link to animations of the imagery.

Figure 1: *Picasso's Dove on Venus De Milo*

Figure 2: *Bertel Thorvaldsen's Fibonacci*

Figure 3: *Rodin's Monument to Balzac*

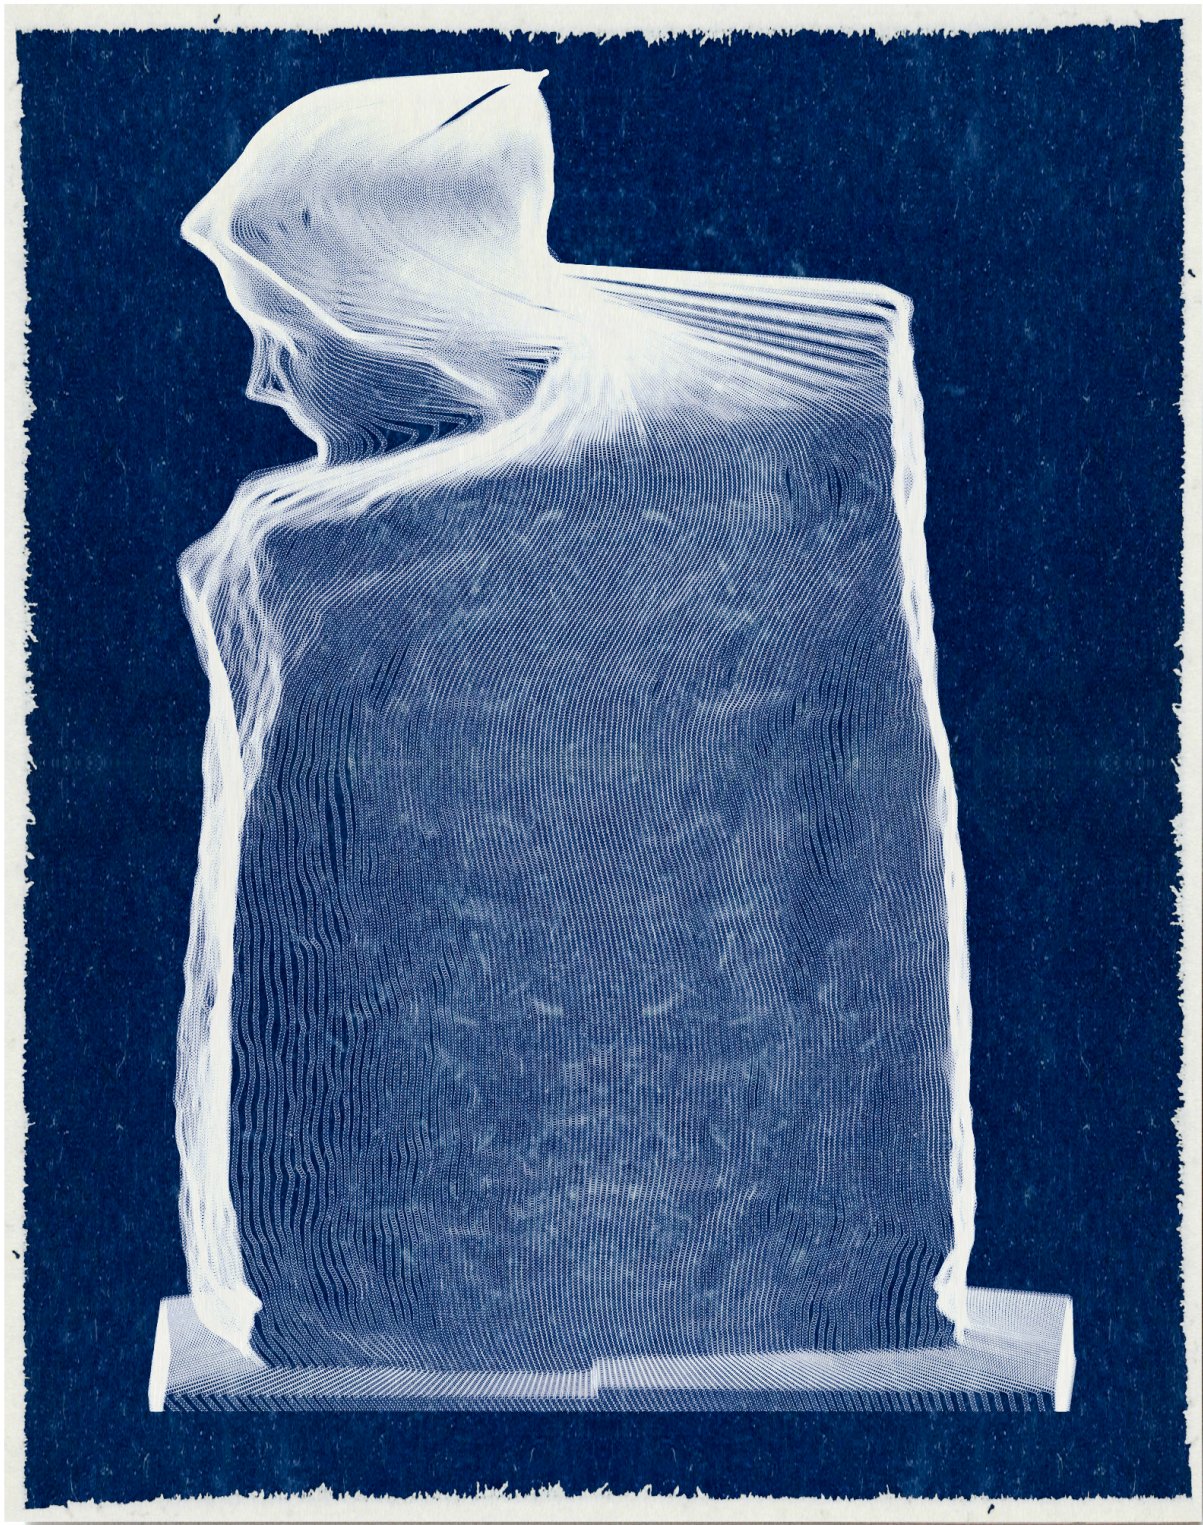

Figure 4: *Rodin's La Pensée*

Figure 5: *Alan Bridgwater's Spring*

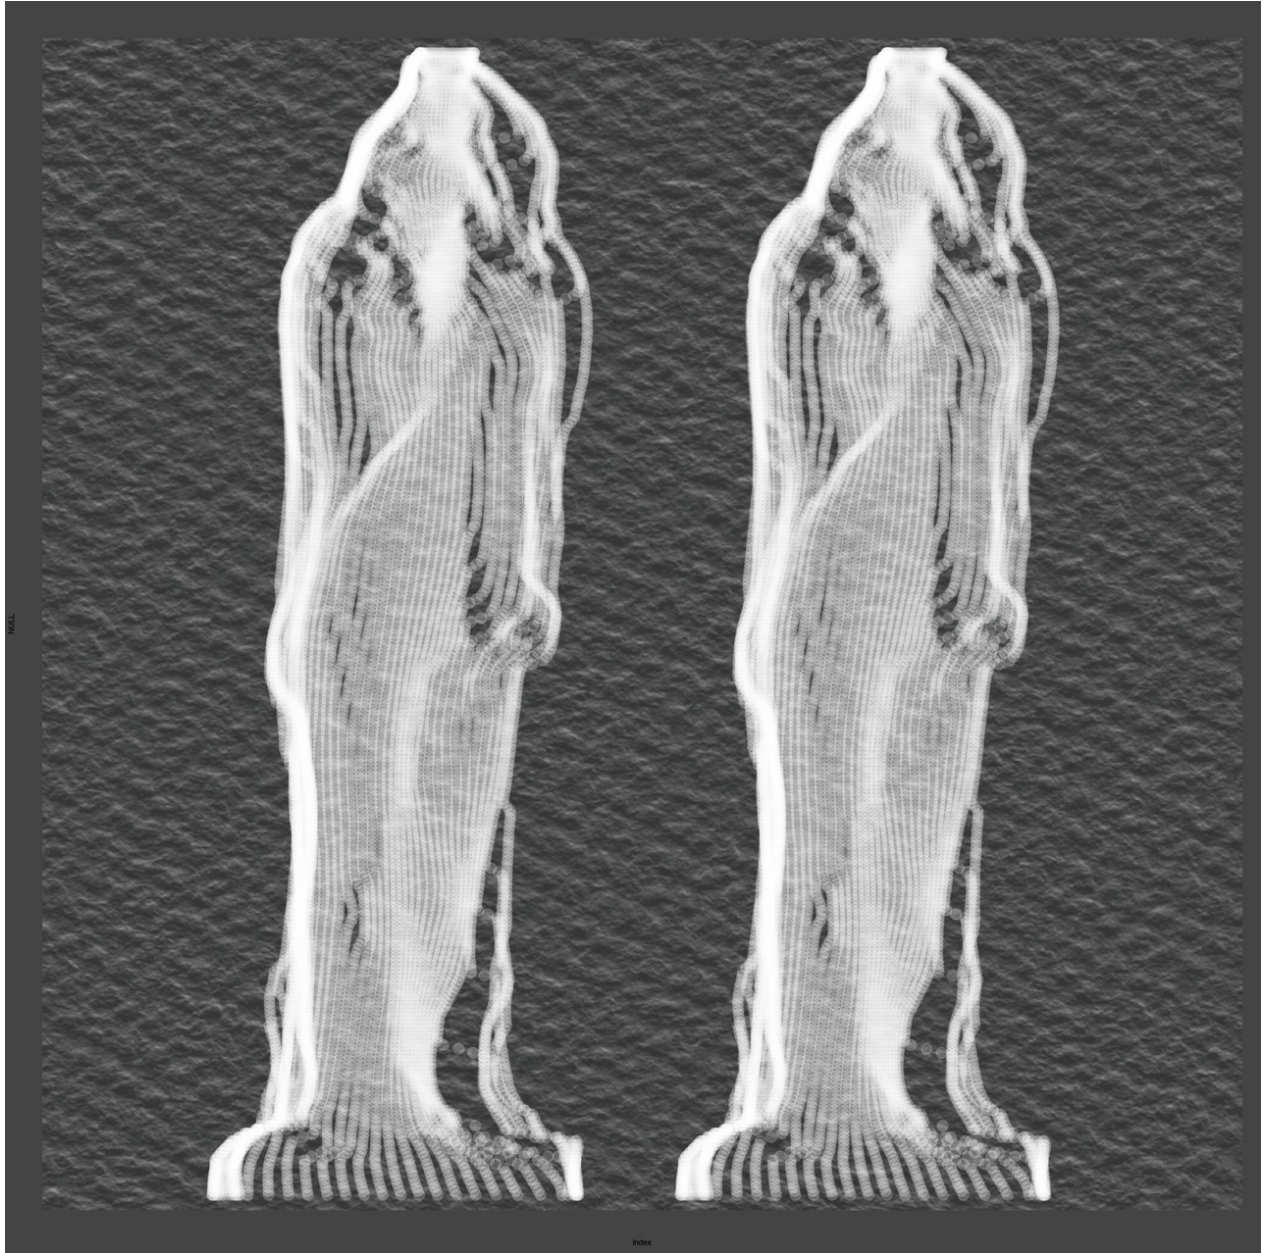

Figure 6: *Animation* in which each sculpture transforms between Rodin's Monument to Balzac and Harald Sörensen-Ringi's *The Night*.

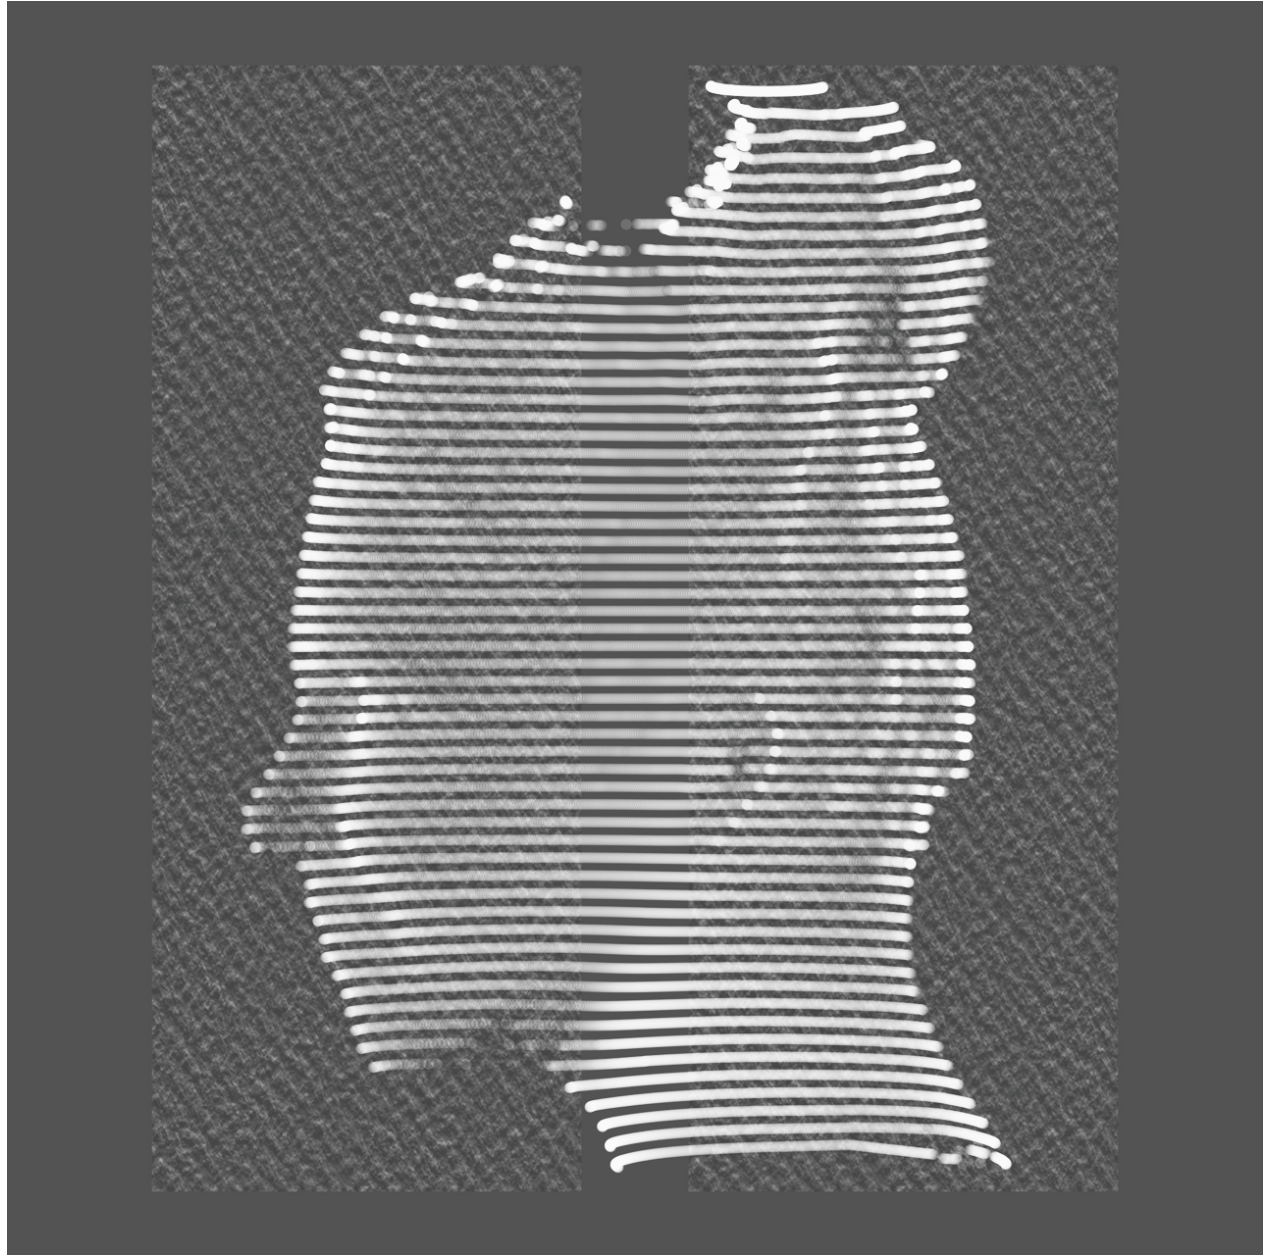

Figure 7: *Animation* in which the portrait flips towards you and turns itself inside out as an application of the hidden mask illusion.

Figure 8: *Animation* in which the image forms from a cloud of dots dissolves and then reforms. It is based on a sculpture called *Mujer* at Barcelona–El Prat Airport, Spain.
